Lines and Currents

Help frame 80 years of Mensa

Eight decades of Mensa means there are plenty of stories worth telling. We're looking for a volunteer Video Project Coordinator to help create our official anniversary video for its premiere at the IBD Meeting in Bucharest. If you enjoy weaving together compelling stories and a little creative magic, your next project is waiting.

Bulletin feature: The Intelligence Test

What does artificial intelligence reveal about human intelligence? Mensa member and author Robin Green explores how AI is becoming a mirror for humanity, highlighting the growing importance of creativity, judgment, ethics, and purpose. He argues that while AI can enhance human potential, the choices we make about how we use and govern it will determine whether it strengthens or diminishes what makes us uniquely human.
